

COLOR COMBINATIONS

Lacquers are not carried in stock. The factory will secure and ship as quickly as possible any standard colors not available locally, but cannot guarantee the colors to be an exact match of that on the car, as all colors may change slightly due to climatic conditions and exposure to the weather. For convenience and assistance in procurement, the original color name and numbers are shown with matching Dupont reference, starting with 1949 Series. Dupont and Rinshed Mason stock numbers are shown for series 1954 thru 1957. On parts using high temperature drying enamels, a reference is made to nearest match of air-drying lacquer.

The color reference charts are divided into two sections; the first chart in each series covers the exterior parts, this is followed by interior color information. The following Page Reference Chart arranged by series can be used as an index for locating color combinations.

Page Reference Chart For Exterior and Interior Color Combinations, Arranged by Series

SERIES - Page No.		SERIES - Page No.	
1949	G-15	1954	G-20 thru G-23
1950	G-16	1955	G-24 thru G-27
1951	G-17	1956	G-28 thru G-33
1952	G-18	1957	G-34 thru G-39
1953	G-19	1958	G-40 thru G-42

INTERIOR COLORS: Series 1949 thru 1958

Color information for interior parts follows each exterior color chart in each series. When the color application is controlled by various factors, such as exterior color, color of trim, changes during the model year etc., detailed charts are presented for reference. No reference is made to bright finish (Chrome) parts.

Transfer Finish: - Parts finished in grain or other design finish can be repaired by following instructions in General Service Letter #765, Dated Oct. 19, 1951. For available materials, refer to groups 33.0001 and 33.0002.

For easy reference and to cover the more common areas and parts, the references in the charts are grouped when the color application is similar, for example; Steering column covers, shifter carrier, horn ring hub and steering column bracket - This group of parts in most applications are of the same color.

EXTERIOR COLORS: Body, Sheet Metal and Wheels - Series 1949 thru 1958

The exterior colors are shown in the first chart in each series and are arranged according to the color combination code number. The code number (Paint No.) is stamped on the metal name plate attached to the front of dash panel, next to engine under the hood.

INTERIOR COLORS - SEE CHART ON FOLLOWING PAGES

COLOR COMBINATIONS—INTERIOR

SERIES 54-60S, 62, 75

GENERAL INSTRUCTIONS FOR DETERMINING INTERIOR LACQUER COLORS. IF COLOR SHADE IS NOT KNOWN IT WILL BE NECESSARY TO REFER TO DETAILED CHARTS THAT FOLLOW.

To take care of refinishing or touch-up on interiors of the 1954 Series cars, with the exception of a few color combinations on the convertible styles 54-6267X and 54-6267SX (exceptions noted below), it is possible to determine the matching color without reference to the detailed paint charts and trim color reference charts on pages that follow if the interior paint color shade is known.

For practical handling it would only be necessary to have available eight (8) different air dry lacquers (that are not used as exterior colors), indicated in the chart below. This group of colors is identified in four (4) different colors - Gray, Blue, Tan, (Brown or Beige) and Green. Each of the four (4) colors is identified in 2 shades - Light tone and Dark tone. Series 54-60S, 62 employ the use of both tones, dark and light; Series 54-75 requires the Dark tone.

For application of the color information the following is an example:

EXAMPLE: Request is received for touch-up on blue paint for Style 54-6219, 4-door Sedan. It has been determined that the Dark Tone lacquer is required for window garnish molding. This request will require lacquer identified as Princess Blue (Dark Tone).

If the request was for the Light Tone as used below the window line, the lacquer required is identified as Caprice Blue (Light Tone).

REFERENCE CHART FOR LACQUER COLORS WHEN COLOR SHADE HAS BEEN DETERMINED

	LACQUER SHADE	COLOR NAME	ENAMEL	LACQUER	MATCHING DUPONT COLOR
Gray	Dark Tone	Cumulus Gray R - M	E-28-A010	L-22-A011	1893-H

INTERIOR COLORS - SEE CHART ON FOLLOWING PAGES

COLOR COMBINATIONS-INTERIOR SERIES 55-60S,62,75

GENERAL INSTRUCTIONS FOR DETERMINING INTERIOR LACQUER COLORS.
IF COLOR SHADE IS NOT KNOWN IT WILL BE NECESSARY TO REFER TO
DETAILED CHARTS THAT FOLLOW.

To take care of refinishing or touch-up on interiors of the 1955 Series cars, with the exception of a few color combinations on styles 55-6019X,6237DX,67X,67SX,7533X (exceptions noted below), it is possible to determine the matching color without reference to the detailed paint charts and trim color reference charts on pages that follow if the interior paint color shade is known.

For practical handling it would only be necessary to have available eight (8) different air dry lacquers (that are not used as exterior colors), indicated in the chart below. This group of colors is identified in four (4) different colors - Gray, Blue Tan, (Brown or Beige) and Green. Each of the four (4) colors is identified in 2 shades - Light tone and Dark tone. Series 55-60S, 62 employ the use of both tones, dark and light; Series 55-75 requires the Dark tone.

For application of the color information the following is an example:

EXAMPLE: Request is received for touch-up on blue paint for Style 55-6219, 4-door Sedan. It has been determined that the Dark Tone lacquer is required for window garnish molding. This request will require lacquer identified as Countess Blue (Dark Tone).

If the request was for the Light Tone as used below the window line, the lacquer required is identified as Minuet Blue (Light Tone).

COLOR COMBINATIONS-INTERIOR SERIES 55-60S,62,75

If color required cannot be determined according to the general instructions on previous page, use the charts below in the following manner:

1. If trim code number is known, but trim color is not, refer to TRIM CODE COLOR REFERENCE CHART to determine trim color.
2. When trim color is known, refer to PAINT COLOR CHART to determine R-M number of original color.
3. Refer to CHART OF MATCHING COLORS for paint numbers of available matching Dupont colors.

INTERIOR COLORS - SEE CHART ON FOLLOWING PAGES

COLOR COMBINATIONS-INTERIOR SERIES 56-60S, 62, 75

GENERAL INSTRUCTIONS FOR DETERMINING INTERIOR LACQUER COLORS. IF COLOR SHADE IS NOT KNOWN IT WILL BE NECESSARY TO REFER TO DETAILED CHARTS THAT FOLLOW.

To take care of refinishing or touch-up on interiors of the 1956 Series cars, with the exception of a few color combinations on styles 1956 exc. 7523X (exceptions noted below), it is possible to determine the matching color without reference to the detailed paint charts and trim color reference charts on pages that follow if the interior paint color shade is known.

For practical handling it would only be necessary to have available eight (8) different air dry lacquers (that are not used as exterior colors), indicated in the chart below. This group of colors is identified in four (4) different colors - Gray, Blue, Tan, (Brown or Beige) and Green. Each of the four (4) colors is identified in 2 shades - Light tone and Dark tone. Series 56-60S,62 employ the use of both tones, dark and light; Series 56-75 requires the Light tone.

For application of the color information the following is an example:

EXAMPLE: Request is received for touch-up on blue paint for Style 56-6219, 4-door Sedan. It has been determined that the Dark Tone lacquer is required for window garnish molding. This request will require lacquer identified as Dk. Blue (Dark Tone).

If the request was for the Light Tone as used below the window line, the lacquer required is identified as Lt. Blue (Light Tone).

COLOR COMBINATIONS-INTERIOR SERIES 56-60S, 62, 75

COLOR CHARTS FOR INTERIOR PAINTED MOLDINGS, PANELS AND RELATED PARTS

Interior moldings, panels and painted parts are finished in colors to harmonize with the interior trim material color shades. To assist in determining trim color requirements, if the trim color is not known, reference can be made to the trim code chart shown below. For convenience and assistance in procurement, the original color name and numbers are shown with matching Dupont stock number reference. On parts using high temperature drying enamels, a reference is made to nearest match of air-drying lacquers.

For easy reference and to cover the most commonly called for areas and parts, the reference is keyed to five (5) major group charts, that cover the front end items, namely: Instrument Panel, Windshield Garnish Molding, Door and Quarter Belt Panels, Steering Column Jacket and Covers, Horn Ring Hub and Spokes, Cowl Heater Grille, etc.

INTERIOR COLORS - SEE CHART ON FOLLOWING PAGES

COLOR COMBINATIONS-INTERIOR SERIES 57-60S, 62, 75

GENERAL INSTRUCTIONS FOR DETERMINING INTERIOR LACQUER COLORS.
IF COLOR SHADE IS NOT KNOWN IT WILL BE NECESSARY TO REFER TO
DETAILED CHARTS THAT FOLLOW.

To take care of refinishing or touch-up on interiors of the 1957 Series cars, with the exception of a few color combinations on styles 1957 exc. 6237,39,7523X (exceptions noted below), it is possible to determine the matching color without reference to the detailed paint charts and trim color reference charts on pages that follow if the interior paint color shade is known.

For practical handling it would only be necessary to have available eight (8) different air dry lacquers (that are not used as exterior colors), indicated in the chart below. This group of colors is identified in four (4) different colors - Gray, Blue, Tan, (Brown or Beige) and Green. Each of the four (4) colors is identified in 2 shades - Light tone and Dark tone. Series 57-60S,62 employ the use of both tones, dark and light; Series 57-75 requires the Light tone.

For application of the color information, the following is an example:

EXAMPLE: Request is received for touch-up on blue paint for Style 57-6239, 4-door Sedan. It has been determined that the Dark Tone lacquer is required for windshield lower garnish molding. This is the only position that requires the Dark Tone. This request will require lacquer identified as Dk. Blue (Dark Tone).

If the request was for the Light Tone as used in all other positions, the lacquer required is identified as Lt. Blue (Light Tone).

COLOR COMBINATIONS-INTERIOR SERIES 57-60S, 62, 75

COLOR CHARTS FOR INTERIOR PAINTED MOLDINGS, PANELS AND RELATED PARTS

Interior moldings, panels and painted parts are finished in colors to harmonize with the interior trim material color shades. To assist in determining trim color requirements, if the trim color is not known, reference can be made to the trim code chart shown below. For convenience and assistance in procurement, the original color name and numbers are shown with matching Dupont and R - M stock number reference. On parts using high temperature drying enamels, a reference is made to nearest match of air-drying lacquers.

For easy reference and to cover the most commonly called for areas and parts, the reference is keyed to four (4) major group charts, that cover the front end items, namely; Instrument Panel, Windshield Garnish Molding, Door and Quarter Belt Panels, Steering Column Jacket and Covers, Horn Ring Hub and Spokes.
